WEEKLY REPORT FOR PERIOD ENDING 22 NOVEMBER 1988

I. <u>Progress Report on Tasks Assigned by the DCI/DDCI</u>:

II. <u>Items or Events of Major Interest that have Occurred During the Preceding Week</u>:

    A. <u>IDMS/R FARS Database</u>:

25X1

                completed loading the suspense data from the Data General (DG) mini-computer to the staging area of the Integrated Database Management System/Relational (IDMS/R) FARS database. The suspense file contained 8281 records and the suspense message file contained 26761 records. All of the messages on DG FARS are in one file, the suspense message file, and the messages in IDMS/R FARS will

25X1 be split among three files. Therefore, [   ] is writing a PL/I program to divide the messages among the three IDMS/R

25X1 message files. [   ] is writing the procedures to migrate the data for the six parameter tables from DEVDICT to

25X1 STAGDICT. Additionally, [   ] (FARS DBA), agreed to a tentative move to production for the week of 12 December 1988, provided that the production space is allocated and the

25X1 statistics are within the necessary limits. [   ]

25X1

    C. <u>CLAS Supply Team</u>:

        1. The CLAS Supply Team held a training class for the 11 members of the Requirements Section of the Material Support Branch on the inquiry capabilities of the Bill of Materials (BOM) package. It is anticipated that the Supply Team will hold two more training classes before turning over training responsibility to the Data Management Branch.

2. The Supply Team conducted a test on the response time of the BOM production database when utilizing the Delta Data, the IBM 3270 and the Wang VS-75 system. The test was performed in order to determine if response time was improved via the IBM 3270 or the Wang VS-75 as opposed to the Delta Data. Unfortunately, it does not appear that there was any appreciable difference between the three.
